## BREAK-EVEN WORKSHEETS: DOLLAR BASIS

Step 1: Using your most recent income statements, classify all costs as either fixed or Classify Your Costs variable, then total each category.

| Actual Total Sales | $=\$$ |
| :--- | :--- |
| Total Variable Costs | $=\$$ |
| Total Fixed Costs | $=\$$ |

Step 2: "For every $\$ 1.00$ of sales, what percent goes away to variable costs?"

## Calculate Variable

Cost Percent

Step 3: "For every $\$ 1.00$ of sales (after paying for variable costs), what percent is left to cover Calculate fixed costs . . plus any targeted profit?"

## Contribution Margin

$$
100 \%-\text { Variable Cost Percentage }=100 \%-\quad \%=\ldots
$$

Step 4: "How many 'cents-es' does it take to cover your fixed costs?"

## Calculate Break-

Even Sales Break-Even Sales $=$ Total Fixed Costs $=\$ \quad=\$$
Contribution Margin \%

NOTE: To calculate the sales needed to generate a target profit, just add that target profit amount to your total fixed costs, then divide that amount by your contribution margin.

Step 5: "Does the sales level you figured actually break-even - or give you the profits you target?"
Check Your Break-Even Sales

Calculations

| (minus) Variable Costs* | - | $\square$ |
| :--- | :--- | :--- | :--- |
| (equals) Contribution Dollars | $=$ | $\square$ |
| (minus) Fixed Costs | - |  |
| (equals) Net Profit | $=$ |  |

[^0]
## BREAK-EVEN WORKSHEETS: PER UNIT BASIS

| Step 1: | Using your most recent income statements, classify all cost <br> variable, then total each category. Record the actual numb <br> Classify Your Costs volume. |
| ---: | :--- |
|  | Actual Total Sales |
| salal Variable Costs | $=\$$ |
| Total |  |
| Total Fixed Costs | $=\$$ |
| Total Units Sold | $=\$$ |

| Step 2: | Price Per Unit $=$ |
| ---: | :---: |
| Total Sales <br> Calculate Your Price <br> Per Unit | $=\$$ |

Step 3: Variable Cost Per Unit $=\frac{\text { Total Variable Costs }}{\text { Total Units Sold }}=\$ \ldots$ per unit
Calculate Your
Variable Cost Per Unit

Step 4: Price per Unit - Variable Cost per Unit = Contribution Margin Cost Per Unit
Calculate Your

Contribution
Dollars Per Unit
$\qquad$ per unit - \$ per unit $=\$$ $\qquad$ per unit

| Step 5: <br> Calculate Your <br> Break-Even Sales <br> in Units | Break-Even Sales $=$ |
| ---: | :--- |

[^0]:    * Compute this figure by multiplying Break-Even (above) by the Variable Cost Percent in Step 2.
